

MYTH: We have enough healthcare research, education, and training.

REALITY: “The MHD campus facilities will provide excellent education opportunities and preceptorships for current and future healthcare practitioners, which will provide the Inland Empire with a competent and capable healthcare and workforce.”

Richard K. Tworek, Ph.D.
*President Emeritus
RCC Moreno Valley Campus*

FUTURE: Entirely new healthcare for the entire community.

We are creating a state-of-the-art LifeCare campus that will bring healthcare, wellness, research, and education and training together under one roof.

Through partnerships with hospitals, ambulatory surgery centers, physician groups, education and research institutions, March Healthcare Development is bringing economic vitality to our community while improving lives.

The Campus will feature Centers of Excellence for the most pressing medical needs of our time, including cancer, heart disease, and stroke. This Medical Campus will provide care for all members of the community, through all stages of life, providing a total health care experience—from the mind/body connection through to skilled nursing facilities and hospice.
