

March Healthcare Development

Entirely new healthcare for the entire community.

July 10, 2009

MYTH: We have enough hospitals already.

REALITY: "Riverside County is under-served and over-crowded. Putting all the specialty services together in one spot is practical, economical, and means having vital specialty services currently not available in our community."

Joan Sparkman,
Chairman of the Board,
Southwest Health Systems

FUTURE: Entirely new healthcare
for the entire community.
