

March Healthcare Development

Entirely new healthcare for the entire community.

JULY 20, 2009

MYTH: There are a lot of doctors out there.

REALITY: "It is well documented that we have a shortage of physicians in our community. The benefits of a health insurance plan are only as good as the quality of available healthcare. MHD's approach to solving this need will create Centers of Excellence for our region."

*Bob Lancaster,
Vice President,
Hub International,
Employee Benefits Division*

FUTURE: Entirely new healthcare for the entire community.
